(Blue Lily of the Nile.)

This is a splendid ornamental plant, bearing large clusters of bright blue flowers on long flower stalks and lasting a long time in bloom. It does well in the house or greenhouse in Winter, requiring slight protection. It is a rapid grower, and increases in size and beauty every year; the chief point in its cultivation is to divide the plant before the pots or tubs become overcrowded with roots. With the ordinary kind of care, it is a plant that will last forever. Price, strong plants, 20 cents.

They must be seen to get a proper idea of their gorgeous magnificence. Plant the bulbs either in sand and pebbles covered with water, like a Sacred Lily, or in pots filled with good rich soil. If planted in the same manner as the Chinese Sacred Lily, the blooms will appear much sooner, but will not last so long as when planted in earth. Also known as "Gold Banded Lily from Japan." Price, 20 cents each. Ready in November.

The True Bermuda Easter Lily, LILIUM HARRISII.

This peerless Lily is the greatest acquisition to floriculture made in many jears. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open or partially open, they can be kept for two weeks. Bulbs potted in August can be had in flower in November if desired. The quantity of bloom produced is marvelous, the average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers; and of bulbs seven to nine inches, eight to twelve flowers. Blooming plants in pots form typical Easter offerings and presents, for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every Winter for this purpose. As a garden Lily it is of great beauty, being entirely hardy excepting in northern clinates where it requires a protection of leaves or litter to the depth of five or six inches. Price, 20 cents each; three for 50 cents.

Keep them in a cool, light place, watering lightly until growth begins. Then water freely and give plonty of light and air. On the approach of cold weather remove to a warmer situation, the parlor or greenhouse, but keep them near the light. The Beautiful New Rose, MAID of HONOR.

Advertised as Miss Clara Barton. This grand sport from Bridesmaid originated with the Hoffmeisters of Ohio. They say of it: "After rigid tests during the last two years we are able to state: 1st, that its color is a rich, glowing pink, darker than Bridesmaid; 2d, that it is an excellent keeper, and sells over the counter better than Bridesmaid; 3d, that it is a most prolific bloomer, with all perfect buds." Price, 10 cents each; large two-year-old plants, 25 cents.

New Rose, The Gem, or the Fair Unknown.

GENERAL ROBERT E. LEE.

Two Unequaled Roses.

The Bride and Bridesmaid.

Price, 10 cents each; large two-year-old plants for 50 cents.

White Tea Rose, The Bride.

This is decidedly the most beautiful white Tea Rose. It is a sport from Catherine Mermet, with which it is identical in growth and shape of flowers. The flowers are very large and double, on long, stiff stems, of fine texture and substance, and last a long time in a fresh state after being cut, making it one of the best varieties for corsage wear or bouquets. Price, 10 cents each; large plants, 25 cents each.

New Tea Rose, Bridesmaid.

Here we have a new rose, a sport from that old stand-by, Catherine Mermet. All know that Catherine Mermet takes precedence as a pink rose. More plants of it are cultivated by the amateur, and more cut bloom is sold by the flower dealer than any pink rose. It is about two shades deeper in color—just enough to make it bright; and it is the same color all the time under every condition of weather and surroundings. Price, 10 cents each; large two-year-old plants, 30 cents.

The White, Yellow and Pink Hermosa Roses.

The White Hermosa, Marie Lambert—This is a lovely white Rose, a pure Tea, but a foreign seedling; the freest flowering white Rose we have seen. It will be especially useful in set designs. For a pot plant it cannot be excelled, as it possesses every good quality of a pot Rose. We counted on one plant 143 buds and flowers in a single day, and the plant was only 9 months old. Try it. Price, 10 cents each; large plants, 25 cents each.

Try it. Price, 10 cents each; large plants, 25 cents each.

Yellow Hermosa Rose, Coquette de Lyon—No Rose like it for freedom of bloom. The plant is a fine grower, and carries numbers of flowers on every shoot. We do not know of any Rose that will give the satisfaction that this variety will, and we heartily recommend it. Price, 10 cents each; large plants, 25 cents each.

The Old Ever-Blooming Rose. Hermosa—We believe the Hermosa is the best known in the entire Rose family, and a universal favorite. New Crimson Rose,

PRINCESS SAGAN.

The flowers of this variety are the richest crimson of any Rose in our vast collection; a single bud or blossom will catch the eye at a great distance, so brilliant is the color. Indeed, it is unmatched in its velvety richness; could be well termed "The Velvet Rose." It is as free in blooming as Bon Silene. One of our customers in California writes that she is kept busy by people asking her what Rose this is. Price, 15 cents each; large two-year-old plants, 30 cents each.

A grand variety. The flowers are of large size, fine, full form, very double and deliciously perfumed; the color is a remarkable shade of rich golden-amber, elegantly tinged and shaded with dark, ruddy-copper. Intensely beautiful and resembling in color a splendid "Afterglow." It is a constant and profuse bloomer. Price, 15 cents each; large, fine two-year-old plants, 30 cents each.

CHRISTINE DE NOUE

New Crimson Tea Rose, Christine de Noue.

New Crimson Tea Rose, Christine de Noue. It is particularly valuable because red has been a very scarce color among Tea Roses, and this one seems exceptionally fine. It is a splendid grower, making a large-sized, graceful bush with bright, deep green foliage; a constant and very free bloomer; the flowers are well-borne upon strong stems, and are unusually large and handsome; the buds are long and finely pointed, and the color a clear, rich maroon, or deep purplish-red, passing to lake, center sometimes streaked with silvery-white; the petals are finely imbricated, and the flowers are deliciously sweet. The Charming New Decorative Plant,

Asparagus Sprengeri.

(EMERALD FEATHER.)

When introduced, at a high price, a little over a year ago, this variety was received with some hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large roses, etc., but grown in suspended pots it makes one of the prettiest decorative house plants we know of. As a window, table or parlor plant, it stands at the head of the list. It remains fresh and green throughout the whole year, and the feathery spikes retain their freshness for six weeks after cutting if placed in water. It is a strong, vigorous grower and resists all diseases that attend house plants. It withstands a dry atmosphere as no other plant will. It produces small white flowers which are succeeded by red berries, which form a striking contrast against the dark-green background. A well-established plant is literally a mass of emerald green. The flowers are not more than half an inch in diameter, but they are produced in such great abundance that a few plants present a dense mass of bloom, which continues without interruption and with increasing vigor from September until June. The fragrance is delicious, resembling the English Hawthorn blossoms, and is so subtle and penetrating that a large plant in bloom will fill the air with fragrance. It begins to bloom late in August or early in September, at a time when most other hardy climbers are out of bloom, an inestimable advantage. It is a strong, rapid grower, quickly reaching a height of from fifteen to twenty feet, and spreading out when trained to wires or string.
